Types of Data

Color: The favorite color of each participant (Nominal Data).
Satisfaction: The satisfaction level of each participant (Ordinal Data).
Temperature: The temperature of each participant's city in Fahrenheit (Interval Data).
Income: The annual income of each participant in dollars (Ratio Data).
Number of Children: The number of children each participant has (Discrete Data).
Weight: The weight of each participant in kilograms (Continuous Data)
Temperatur(Kelvin) : The temperature of each participant's city in Fahrenheit (Ratio Data)

Qualitative Data

→ categorical data

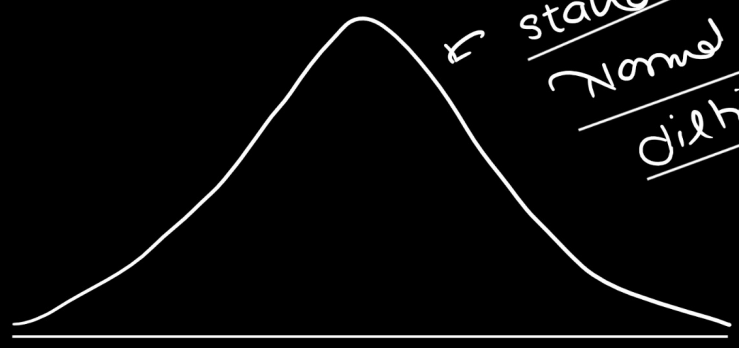
- Nominal
  - Color type
- Ordinal
  - Education_level
    - 12th Pass
    - Bachelor's
    - Master's
    - PhD

Quantitative Data

- Interval data
  - no true zero
  - temperature → 0°c
- Ratio data
  - actual true zero
  - income → 0

Discrete → num of children (0, 1, 2 or max)

Continuous → Weight



← standard Normal distribution (-ve, +ve)

Income ← -ve values
